1939 Booklet of
**ROGERS' FRUITS AND
FLOWERS**

THE WINFIELD NURSERIES
WINFIELD **THOS. ROGERS** **KANSAS**

Winfield, Kansas
January, 1939

TO OUR FRIENDS AND CUSTOMERS:

Dear Folks:

That we might show you the Winfield Nurseries, that parent garden of the flowering and fruiting stock that is being sent out under our labels, has often been our wish. Such a trip being impractical to most of you, we are doing the next best thing, presenting you with our Catalog of Fruits and Flowers--bring the Winfield Nurseries to you, within your grasp, your range of vision--and in this crude way point out to you the untold possibilities and beauty that may be derived from Rogers' trees and plants.

We offer you sound, healthy stock, potential in bloom and fruitage, and by reason of special training and long experience we can aid you in your choice. Yours, however, is the privilege of selecting, planting, caring and storing up that most delightful and responsible of vocations. Order abundantly today with thought for future needs, that you and yours may harvest with both pleasure and profit.

Thanking you for your past business and awaiting your early orders, which, we assure you, will receive our prompt attention and careful consideration, and with best wishes to you all for the coming season,

Very sincerely,

THE WINFIELD NURSERIES

Per Thos. Rogers

WHEN TO ORDER

Just as soon as you receive this catalog make out your order and send it to us so that we may reserve the stock you want.

Our plants sell out early every year, and many customers who wait until planting time to order are disappointed. Orders are booked in rotation, and first orders receive first attention according to shipping date on order. This is the only fair thing to do.

The spring shipping season opens usually about February 20, depending on the weather and continues the greater part of May. Fall orders can be filled in October and November, but spring planting is best.

Nursery stock is not like dry goods! When the supply is sold out, it takes a whole year to grow more. Get your order in early so that we may reserve your stock until spring shipping time. Don't be impatient about shipping dates as weather conditions often hinder the regular digging of stock. We do our best to ship your order as specified.

HOW TO ORDER

Use the order blank provided in this catalog. GIVE COMPLETE NAME AND ADDRESS, SHIPPING POINT, AND WRITE PLAINLY. More order blanks sent upon request.

FOR YOUR INFORMATION

As we invite your orders for the trees and plants we illustrate and describe, you may ask—and surely you are entitled to know—who we are, and what our business record is; how we have served other buyers and why we know we can serve you to your satisfaction and profit. The facts below are to give you that information.

Well Established

The Winfield Nurseries were founded over forty years ago. It is not uncommon to hear of some nurseries that have been in the same family for generations. Ours is no exception. The personnel of our organization started working in the nursery as boys, as have also most of our present employees.

Our growth has been gradual, but steady, to meet both in quality and kind, the increased demand of buyers. Our big plantings in the Arkansas River Valley in southern Kansas, favored by fertile soil, are also disciplined by climate that produces the best and hardiest trees and plants, thrifty and full of vitality.

Packing, Shipping and Storage Facilities

Our packing, storage and shipping facilities have kept pace with the growth of the business. We have one of the most modern equipped packing and storage nursery plants in the middle west. This assures you that your order will reach you in good, fresh condition. Our whole output is handled under cover at all seasons of the year—a part of our progressive methods that guarantees the freshness, grade and quality of our stock. We have ample shipping facilities out of Winfield: the Santa Fe, Southern Kansas, Frisco and Missouri Pacific railroads running several trains daily in all directions. The Railway Express Agency, Inc., carries express over all lines.

What We Agree to Do

We take all risks of transportation and guarantee the delivery of stock in good order. If not in first-class condition on arrival notify us and we will immediately forward new stock to take its place under the same guarantee. Should any plant die during the first season after planting, having had good care under a normal growing season, we will replace same at one-half the purchase price.

Reference

As to our financial responsibilities we refer you to the First National Bank or any business house of this city. As to fair dealings and trustworthiness we offer you any of your friends who may have purchased stock of us heretofore. Your neighbor may be one of our customers. Ask him.

Stock Healthy and Free From Pests and Disease

State Inspectors examine our stock of trees regularly and thoroughly and every shipment that goes out bears an official certificate of inspection.

Non-warranty—In the event that any stock sold by us should prove untrue to name under which it is sold, we hereby agree on proper proof of such

untrueness to name, to replace that portion of the order proven untrue to name or to refund twice the purchase price thereof. Except for such liability, and in respect to all nursery stock sold by us, we give no warranty, express or implied, as to description, productiveness, or any other matter.

Prices

Prices quoted herein mean that the specified stock will be packed free of charge and delivered in good condition to the transportation company. Our quality plants are priced low, so get your order in early while we have a surplus in all varieties.

How to Ship

Orders will be shipped by freight, express, or parcel post (for small orders of grape vines, blackberry plants, etc.) as you wish. It is best, however, that most orders be shipped by express as this service is prompt and satisfactory, delivery being made to you at once within a few hours after leaving the nursery. Freight shipments, being slow, there is some danger of the stock drying out. Our fruit trees are too large for parcel post shipment.

Transportation Charges

We prepay transportation charges on all orders amounting to \$25.00 or more.

Time of Shipment

Please advise the approximate time you want your order shipped. We will ship your order as nearly as possible on the date you indicate. You must remember that we are governed in this matter by weather conditions. You may be assured that we will use our best judgment and will advise you beforehand as to the shipping date, that you may be looking for the shipment. Our shipping season opens in the fall about October 20th and closes in the spring about May 20th. While you have plenty of time in the spring to plant it is advisable to have your stock ordered and set it out as early as the weather will permit.

Remittance

Should be made by post office or express money order, bank draft, or we will take your personal check, if you prefer. Do not send currency, as it is unsafe.

Entomological Commission of Kansas,
Office of State Entomologist, State University,
No. A-3216, Lawrence, June 10, 1938.

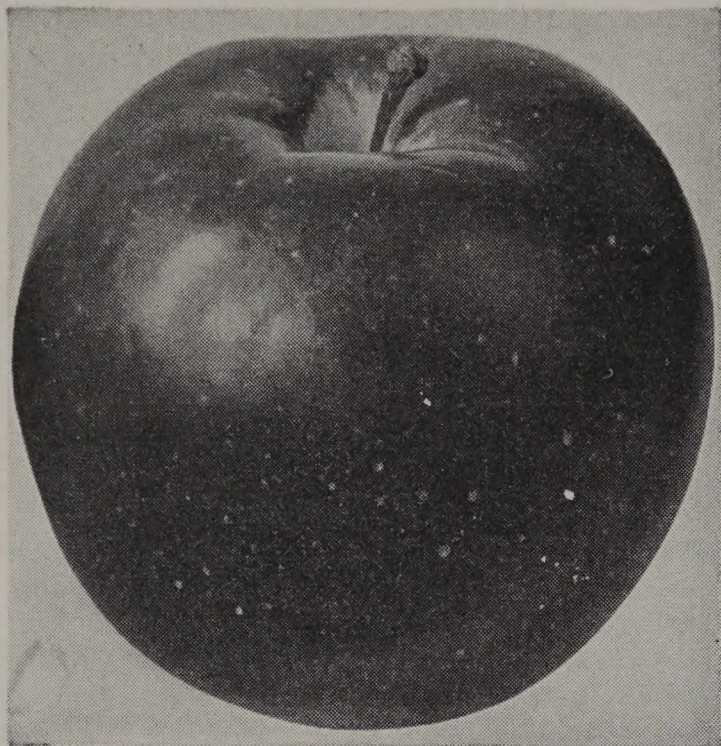

Certificate of Nursery Inspection—This is to certify that in accordance with Section 2-703 of the Revised Statutes of 1923 the nursery stock now growing for sale by Winfield Nurseries of Winfield, Kansas, has been inspected by a duly authorized inspector, and found apparently free from dangerously injurious insects or plant diseases.

Invalid after June 1, 1939.

H. B. HUNGERFORD,
State Entomologist

APPLES

The First Fruit in Importance Is the Apple

Winesap

Selective and Thrifty Trees

We pay personal attention to the selection of our scions and buds for our apple trees. Our buds are selected from hardy, thrifty bearing apple trees that have been producing good crops annually. In this way we not only are certain that our varieties are true-to-name, but we also know that they will produce unusually good crops of fruit of high quality. Our method insures you more vigorous trees that will bear younger and produce better crops than under any other method of propagation.

PRICES ON ALL VARIETIES OF APPLE AND CRABAPPLE TREES

Two-year tops on three-year roots

Height in Feet	Diameter in Inches	Each	10	100
2 to 3.....	$\frac{5}{16}$ to $\frac{7}{16}$	\$0.30	\$2.50	\$22.00
3 to 4.....	$\frac{7}{16}$ to $\frac{9}{16}$.40	3.50	31.00
4 to 6.....	$\frac{9}{16}$ and up	.50	4.50	42.00

Summer Apples

EARLY HARVEST—A yellow apple known to most people. Good for home use.

LIVELAND RASPBERRY—One of the handsomest of summer apples, and among the best quality. Skin clear, waxen white, striped and mottled with crimson.

RED JUNE—Among strictly summer apples the Red June is the best. Its deep red color, excellent quality, and

good bearing quality, makes it a favorite.

YELLOW TRANSPARENT—This variety is somewhat more conical than Early Harvest, more yellow and better flavored. The color is a clear, bright yellow when ripe, but the fruit is fit to use long before it reaches maturity. One of the earliest.

Autumn Varieties

GRIMES GOLDEN—This is the best early winter variety. It is a golden yellow color. Uniform in size, and possessed of a texture and flavor that is pleasing to the palate. Very good cooker. One of the best commercial varieties.

JONATHAN—The color is a cheerful red and waxy skin. Its juicy, snappy flavor makes it appeal to the consumer. One of the five best commercial varieties.

KING DAVID—Very productive, bearing good crops year after year. This variety is similar to Jonathan only more tart. Good size, very rich red, almost purplish black on the sunny side.

WINTER BANANA—This is not a winter variety as the name implies. Ripens in early fall. It is a clear yellow. Bears young, good cooking apple and one that should be planted more freely in this section.

Winter Varieties

BEN DAVIS—Striped red, large and attractive. Sure bearer. The tree is a rank grower. Its greatest fault is the quality.

DELICIOUS RED—It is delicious in every sense of the word. Beautiful red color. Most wonderful eating apple and demands a good price. The blossom end of the fruit is five-lobed. Good keeper and good cooking apple. Plant this apple.

YELLOW DELICIOUS—Many say this is the finest of all yellow apples. It bears young and heavily. The fruit is large, juicy and exceptionally fine quality. Every home should have at least one tree of this choice apple. Many firms ask a higher price for it, but we sell it right along with the others.

APPLES (Contd.)

Winter Varieties (Cont.)

ROME BEAUTY—Of the large round, red apples this is one of the best. The flesh is firm, juicy, mild, pleasant flavor and excellent for eating.

STAYMAN WINESAP—This tree is a strong grower, and the fruit is large, mighty good apple. Color red. Its faults are that it sometimes cracks if the seasons are dry.

WINESAP—One of the oldest and popular varieties, being a good shipper and keeper in storage. Splendid bright red. Flesh tinged with yellow. Very firm, juicy and good flavor. The best commercial variety for this country. Eighty per cent of the trees growing in the commercial orchards of Kansas and Oklahoma are Winesap.

YORK IMPERIAL—An old-time favorite with many people. This variety is still planted in home orchard but not so much for commercial use.

Delicious

**BUY FRUITS NOW WHILE
PRICES ARE DOWN!**

Crabapples

FLORENCE—A crab larger than the Transcendent. The quality is excellent. We have found this variety the best of all crabs.

WHITNEY—A popular crab of good size. Fruit is attractive yellow striped with red. Good quality.

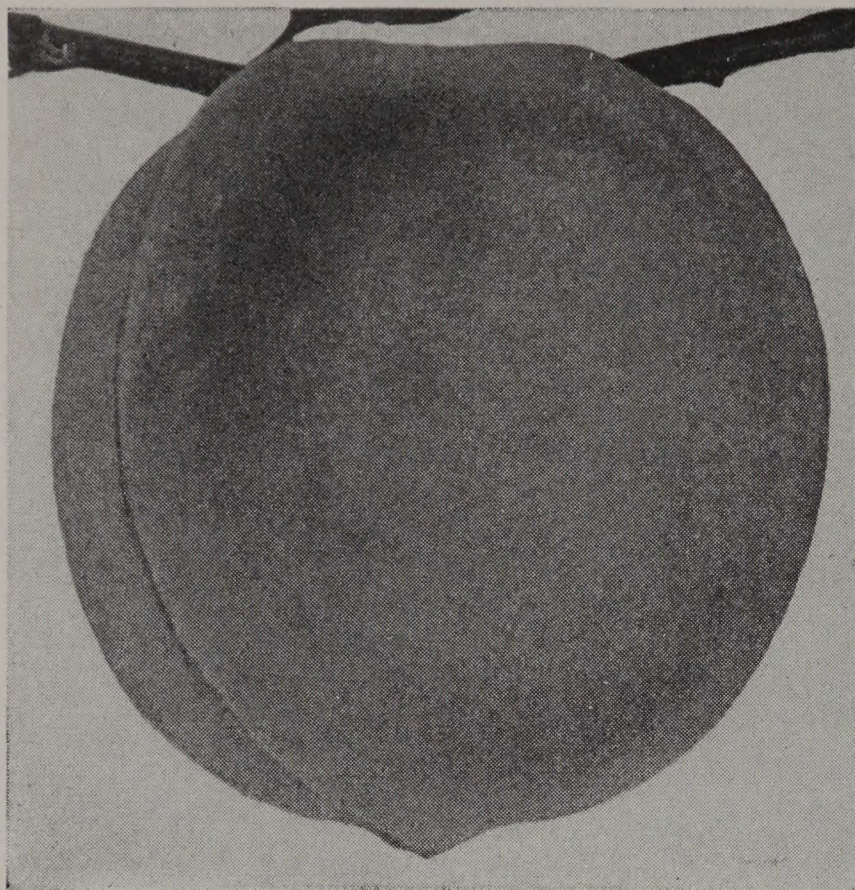

TRANSCENDENT—The fruit is brilliant bright red of fair quality. The fruit is good for jelly and preserves.

Why buy weak, slim, light-weight plants and wait for years to obtain fruit when Rogers' bushy, thrifty, well-rooted stock costs very little, if any, more?

Ask us for any kind or sizes of any trees not listed in our catalog. We have several other kinds; and many larger and smaller sizes in the varieties listed.

Everyone Can Now Afford to Plant at Our New Low Prices

PEACHES FOR EATING AND CANNING

Elberta Peach

The most excellent of all fruits and if given proper care and attention it is one of the most profitable. No fruit commands better prices in its season. A commercial peach orchard is an investment which will yield almost unbelievable returns at an early age. You, who have depended on the market for your peaches, know that the supply will never equal the demand. And, of how much better flavor is the fresh fruit picked off your own trees than that which has been picked

Sensational Price Reductions!

PRICES ON PEACHES
Select trees in cold-resisting dry weather varieties

green and shipped a long distance. You will never know the real flavor of the peach until you have the opportunity of picking your own fruit.

We use the same care and diligence in selecting our budwood for our peach trees as in apple trees. We are fortunate in that our nurseries are located in the heart of the commercial orchards in the rich fertile Arkansas River valley. We know varieties, seeing them fruit year after year. We are only listing such varieties which we know to be the best. Discarding old and obscure varieties, we are listing in their place the newer and better improvements. **All the varieties listed are freestones, unless otherwise noted.**

A sandy loam or gravelly soil is best, but the peach will adapt itself to any soil not wet. A northern slope is preferable to southern, as it retards early blooming. Perhaps the best cultivation is frequent shallow stirring of the soil until July or August, followed by a green cover crop turned over in the spring. The trees should be set 16 to 18 feet apart, requiring 134 to 170 trees per acre.

First Class Stock in Every Particular
Well rooted, clean thrifty trees.

PRICES

Height in Feet	Diameter in Inches	Each	10	25	100
2 to 3.....	$\frac{5}{16}$ to $\frac{7}{16}$	\$0.23	\$2.00	\$3.75	\$12.50

4 to 5.....	$\frac{9}{16}$ to $\frac{11}{16}$.43	3.75	7.00	25.00
5 to 6.....	$\frac{11}{16}$ and up	.50	4.50	8.00	30.00

Japan Blood Dwarf 5c per tree higher in all grades.

BELLE OF GEORGIA—A creamy-white peach with a beautiful crimson cheek, grown largely as a commercial peach, but should be in every home orchard. The trees are hardy, vigorous, and very productive. Of excellent quality, but in many of our customers' opinion it is not quite the equal of our Champion. Ripens a few days before Champion.

CARMEN—It is a real white peach and ripens before other white peaches. Very hardy in the bud, missing frost when others fail. A good canner. You will like this peach.

CHINESE CLING—A large globe-shaped, creamy white peach with a red

cheek. The best of all clings in our opinion. Ripens around the first of September.

CHAMPION—Fruit large, beautiful in appearance, flavor delicious, sweet, rich, and juicy; skin creamy white with red cheeks. The peculiarity of this acquisition is its hardiness. It withstood a temperature of 18 degrees below zero and produced an abundant crop the following season, and in 1890 produced a full crop when the peach crop was a universal failure. The tree is vigorous, healthy and very productive. Ripens in late August or early September.

CRAWFORD'S LATE—Of good size; golden-yellow with deep red cheek. The flesh is deep yellow, rich and sweet, and of very good quality. Ripens around the first of September.

EARLY WHEELER—The tree is hardy, vigorous, and productive. The fruit is of good size and of showy appearance, being creamy-white, splashed with red. The flesh is white. As a home fruit it is one of the best and is a leading early market peach. This peach is an established favorite among our Oklahoma customers.

EARLY ELBERTA—A sure money-maker for the commercial orchard. Size and color as the Elberta, but ripens eight or ten days earlier. Slightly better keeper.

ELBERTA—Beautiful yellow, large and shaded with red. Elberta has been the peach for years and is just as good today. The fact that more than 80 per cent of commercial plantings are of this variety speaks well enough for it. We never knew a planter to be disappointed in Elberta. You will prize it highly because of its regular heavy and abundant crops. It is the queen of peaches in the Southwest. Ripens early in September.

HALE HAVEN—A new peach from Michigan of proven value here. A heavy bearer. Large. Yellow flesh of high quality. August.

HENRIETTA CLING—Yellow, with a crimson blush. A large firm, juicy peach of most pleasing flavor. Ripens about September 20th.

INDIAN BLOOD CLING—A very large cling peach, one of the best for pickling and preserving. Ripens about September first.

JAPAN BLOOD DWARF—This peach cannot be recommended too highly. It is of Japanese origin; the tree does not grow large. It is an exceedingly heavy bearer and it is necessary to thin the fruit at least half. The fruit is dark red and the flesh red, with occasional light streaks clear to the pit. Juice is blood-red. Exceedingly small pit. Flavor unsurpassed; rich, juicy, firm, and in fact the one good early peach in preference to anything we have ever seen. It is splendid for table use, canning and market. Brings double the price of the ordinary early peach. Its fine flavor, firm flesh and beautiful color make a favorite wherever known. Tree bears very early; frequently a few peaches the first year; good crop the second year. Fruit ripens the last of June or the first of July. It is unexcelled for any kind of use; hardy, heavy bearer, and in fact the very best early peach we ever saw. No orchard is complete without a few Japan Blood Dwarf, and though they

cost a little more they are well worth it. Plant it without fail.

J. H. HALE—When the J. H. Hale was first discovered it was thought to be identical with Elberta. It is a yellow freestone and of the same type of a commercial peach as Elberta, but considered by many to be better. It ripens a few days earlier than Elberta. It is of a deep golden-yellow color overlaid with bright carmine and of the best quality. Whether you are ordering for a home orchard or a commercial planting we urge you to plant some J. H. Hale.

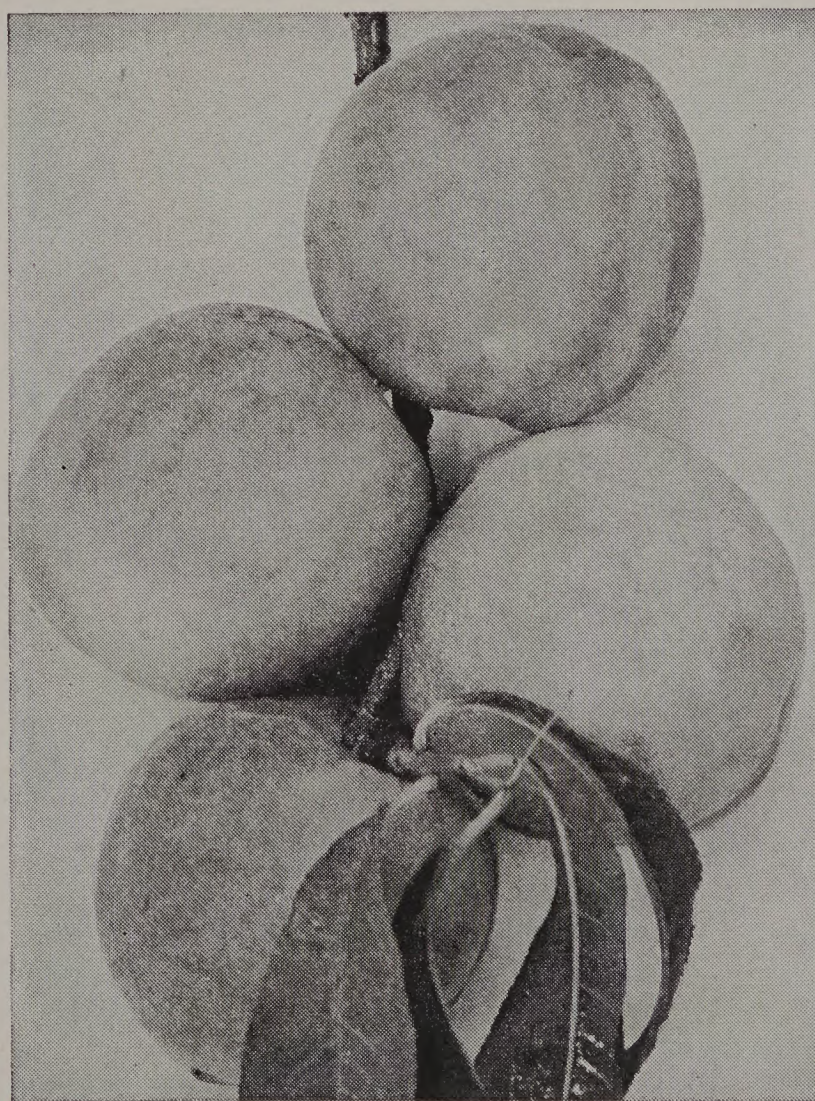

KRUMMELS—Golden-yellow, blushed red and carmine. Large, round, melting, sub-acid, good. Another new peach that is fast gaining in popularity. Ripens in the latter part of September, or first of October.

MAYFLOWER—Very early, ripening about June 10th. Large, very attractive, as it is a bright red. Flesh yellow. Semi-cling. Bears young.

RED BIRD CLING—A creamy white peach, almost covered with red. Large, hardy, and good. An extra early good cling. Ripens about July first.

SOUTH HAVEN—Large, yellow blushed red. Yellow flesh. Fine quality and is hardy. Ripens in August.

We especially recommend the varieties underscored.

J. H. Hale Peaches

PLUMS

Waneta Plums

Plums are especially good for eating fresh, for jellies and preserves, and are unexcelled for canning. Some varieties will thrive wherever apples or peaches can be grown. Most of them, especially the northern Hansen types, bear the third or fourth year. One of the best fruit trees for the home garden, and very profitable in the commercial orchard.

First Class Stock in Every Particular

Prices

Height in Feet	Diameter in Inches	Each	10	100
2 to 3.....	$\frac{5}{16}$ to $\frac{7}{16}$	\$0.25	\$2.50	\$18.00
3 to 4.....	$\frac{7}{16}$ to $\frac{9}{16}$.35	3.20	27.00
4 to 6.....	$\frac{9}{16}$ and up	.50	4.50	40.0

OPATA—One-year-old trees set fruit buds freely. Our largest size trees will bear the year following transplanting. This variety is a cross between Sand Cherry and the Gold Plum, for which \$3,000 was paid when first introduced. The tree resembles the plum in its habit of growth. The fruit is one inch or more in diameter; small pit. It is a dark purplish-red, with blue bloom.

SAPA—Medium to large size, purple plum with purple flesh full of rich juice of fine flavor, ripening a few days after Opata. Very fine for canning. Bears next year after planting and bears regular heavy crops and does well everywhere, North, South, East, West.

WANETA—A northern variety. The fruit is bright red, measuring almost two inches in diameter. Recommended for dry climate and where the frost is a habitual visitor. Very hardy and an exceedingly heavy bearer, as it never misses.

ABUNDANCE—The tree is small, but hangs loaded down with fruit. The fruit should be thinned to allow room for development. It is one of the hardiest and best of the Japanese varieties. The fruit is large, oval and in color amber, changing to cherry. The quality is very good.

BURBANK—The Burbank is a later and somewhat more vigorous variety than the Abundance. It is a dark red, roundish Japanese plum and of good quality. The flesh is a deep yellow, firm, very juicy and sweet. It is considered to be the hardiest and most prolific of the Japanese varieties.

COMPASS—This variety will probably bear more fruit in a shorter time than any other fruit tree. Commences bearing next year after planting and bears heavily every year. The red fruit is juicy and makes fine sauce. Grows everywhere, very hardy.

Opata Plums

**BUY FRUITS NOW WHILE
PRICES ARE DOWN!**

APRICOTS

A beautiful and delicious fruit; a close relative of the plum and peach, combining the qualities of both. The fruit ripens after the early cherries and just before the plums and peaches. The tree is as hardy as the peach and requires about the same cultivation.

FIRST CLASS TREES IN EVERY PARTICULAR

<i>Height in Feet</i>	<i>Diameter in Inches</i>	<i>Each</i>	10	25
2 to 3.....	$\frac{5}{16}$ to $\frac{7}{16}$	\$0.30	\$2.70	\$ 6.25
3 to 4.....	$\frac{7}{16}$ to $\frac{9}{16}$.45	4.20	9.25

5 to 6.....	$\frac{11}{16}$ and up	.75	6.50	15.00

MOORPARK—The fruit is large, orange-

yellow with a red cheek. Sweet and rich. A freestone. Ripens in early July.

OKLAHOMA—A variety being propagated by us from a hardy select strain offered by one of our Oklahoma customers who says that his trees bear good crops four years out of five. We budded a number of seedlings for him, selecting good healthy buds from his wonder tree, and he asked us to grow and offer the variety for our trade as he considered it to be one of the best for hardiness, bearing qualities, and flavor.

SUPERB—One of the best of the apricots offered. It is of Kansas origin and is especially adapted to this locality. Ripens after Moorpark.

NECTARINES

The tree looks and grows similar to the peach tree. The fruit resembles the plum. The Nectarine is sometimes known as the “smooth skin peach.” Our variety, known as the Red Roman, is large, white, and late. It is one of the best.

- 2 to 3 foot size, 25c each, 3 for 60c
- 3 to 4 foot size, 35c each, 3 for 90c

PEARS

Kieffer Pear

No fruit is more delicious than a juicy, home-grown pear. They grow upright, so do not need much room. Require no special care. We have a nice selection of the best varieties and our stock is of extra good quality.

PRICES—Two Year Trees

Height in Feet	Diameter in Inches	Each	10	100
2 to 3.....	$\frac{5}{16}$ to $\frac{7}{16}$	\$0.40	\$3.50	\$30.00
3 to 4.....	$\frac{7}{16}$ to $\frac{9}{16}$.55	5.00	40.00
4 to 6.....	$\frac{9}{16}$ and up	.65	6.00	50.00

DUCHESS—A large showy pear, often weighing a pound each; greenish yellow, rough uneven surface. We consider the Duchess to be the most profitable dwarf pear in this section. The tree is dwarf; does not blight. Heavy bearer. Ripens September to October.

GARBER—The tree is thrifty and bears young. It is almost blight-proof. The fruit ripens the last of September and sells readily on the market. It is of medium size, yellow and well covered with red.

KIEFFER—One of the most popular market pears grown. The tree is a vigorous and upright grower, bears young and heavily, and is almost exempt from blight. The fruit is of good size, rich color and of fair quality. Ripens fall.

SECKLE—The Seckle is often called the Sugar Pear. This fruit is small in size but of excellent flavor. It is generally well known. Ripens August 15th to September.

THE NEW DOUGLAS—Beautiful, large, smooth pear with golden yellow color, flecked with russet. Flavor is delicious, sweet, melting and juicy. Blight-proof and resistant to disease. A regular cropper in all soils. Bears while tree is very young—some have fruit first year.

Mr. Farmer Plant More Fruit

Plant fruit trees liberally for your own use—for your profit. Considering the cash return fruit has a higher yield per acre than wheat or any other cereal crop.

An orchard adds considerably to the cash value of your farm. Besides you can't beat fresh fruit for your table and for canning. Grow your own fruit — can what you can — eat what you can — sell the rest for a money crop.

Weather conditions are ideal right now for planting.

CHERRIES — The King of Fruits

The trees thrive everywhere and bear heavy crops every year.

Montmorency Cherry

Cherries are one of the most popular fruits. Its hardiness, and the fact that it bears annually are strong recommendations. The cherry can be grown on any kind of soil, but prefers a moderately heavy loam. The soil must be well drained. Cherry trees will do better under neglect than any other fruit tree. They need very little attention after transplanting; no pruning and very little spraying. They come into bearing the third or fourth year after planting.

KANSAS DUKE—Our Kansas Duke is a large semi-sweet cherry of deep red color, juicy and rich. The flesh is reddish. The fruit is of the best delicious flavor and is very excellent for eating fresh.

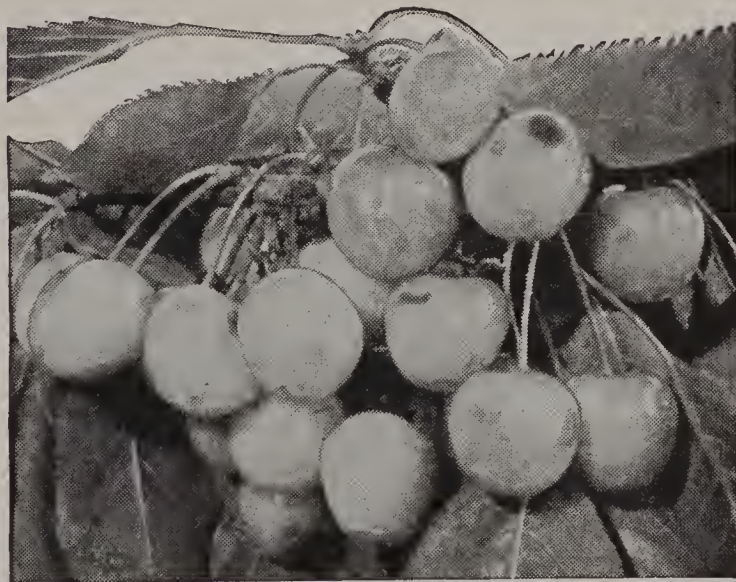

Plant a Kansas Duke cherry if you have room for only one tree. The tree is especially attractive as it is an upright, compact grower, which together with the heavy dark green foliage, makes it a beautiful tree for lawn planting. The Kansas Duke is a prolific bearer and the abundant crops make it especially desirable for home use. It is the nearest sweet cherry that is a success in this climate. Ripens about a week before Montmorency.

MONTMORENCY — With Early Richmond, it is the most widely and numerously planted cherry and the most productive and regular bearer.

PRICES ON EARLY RICHMOND AND MONTMORENCY CHERRY TREES CHOICE STOCK

Height in Feet	Diameter in Inches	Each	10	100
2 to 3.....	$\frac{5}{16}$ to $\frac{7}{16}$	\$0.25	\$2.00	\$18.00
3 to 4.....	$\frac{7}{16}$ to $\frac{9}{16}$.40	3.50	30.00
4 to 5.....	$\frac{9}{16}$ to $\frac{11}{16}$.55	5.00	45.00
5 to 6.....	$\frac{11}{16}$ and up	.65	6.00	55.00

Prices on Kansas Dukes—10c per tree additional for each size. A little higher but they are worth it several times over.

Kansas Duke Cherry

Colors early before ripe. The fruit is roundish, plump, flattened at the end, and a beautiful glowing-red. It hangs in clusters. The flesh is rich and pleasant; of reddish color, tender and firm. A good shipper and canner. The tree is a vigorous, upright grower, but will not quite equal Early Richmond in production qualities. Ripens about the second week in June.

EARLY RICHMOND—Sometimes called the Early May Cherry. It is the favorite early cherry and next to Montmorency, the most popular of all the sour cherries. The fruit is of medium size, roundish shape, flattened at the end; flesh light color, tender and sprightly. A good canner. The tree is medium size, vigorous, upright, spreading, productive and long-lived. Ripens about a week earlier than Montmorency. We suggest that you set one-half of your sour cherries to this variety and the other one-half to Montmorency.

MONTHLY EVERBLOOMING ROSES

Blooms From May Until Late Fall Frosts

Rogers' Collection of Beautiful Roses—Perfectly Hardy
A Success Everywhere

BIG TWO-YEAR PLANTS—EXTRA HEAVY NO. 1

Finest 2-year No. 1 Plants That Will Bloom Freely This Year

AUTUMN—In color the bud is burnt-orange, opening into a bloom that carries the same color with streaks of red, and which is moderately fragrant. The plant is upright in growth, with glossy, leathery foliage and is a free and continuous bloomer.

BETTY UPRICHARD — Inner petals delicate salmon-pink, outer petals deep carmine shaded copper. Large flower, delightfully rolled petals.

CALEDONIA—The exquisite long buds of ivory change to purest white as the flowers open into large, double blooms of velvety texture. One of the best whites.

DAME EDITH HELEN — Magnificent globular form with many rows of petals which curl back artistically, holding steadily a vivid rose-pink.

DUCHESS OF WELLINGTON—One of the most popular yellow garden roses. Intense saffron-yellow, stained with deep crimson, changing to a deep coppery yellow as the flowers are fairly full, with large petals, great substance, delightfully fragrant and very free-flowering.

EDITH NELLIE PERKINS—The long pointed buds on long stems open into perfect flowers of orange-cerise outside and inside of salmon overspread gold. Grows vigorously and blooms freely.

E. G. HILL—Long, pointed buds, with high-centered, very double blooms. Dazzling scarlet with maroon colored velvety surface. One of the best red roses.

ETOILE DE FRANCE—Garnet-red with velvety surface, shading to a vivid cerise at center. Very large, full, fragrant flowers. Blooms continuously.

ETOILE DE HOLLANDE — Immense bloom of deep crimson-maroon. Broadly

rolled petals fold away from high, rounded center. Strong grower. An extraordinary good bloomer.

FRANCIS SCOTT KEY—Deep, glowing red, shading to cerise. Extra large, with a profusion of petals surrounding a high center. Richly perfumed. Extra hardy.

FRAU KARL DRUSCHKI—This is a hybrid perpetual type, blooming profusely in June and again in the late fall months. This rose is also known as Snowqueen and White American Beauty. It is pure white, exquisitely formed in bud and open flower; blooms most abundantly and is considered by everybody as the best white rose.

J. J. L. MOCK—Immense blooms of broad petals rolling outward in majestic form. Cherry-carmine outside, silvery pink inside petals. A very free bloomer and absolutely hardy.

KILLARNEY DOUBLE WHITE—One of the best everblooming white roses.

Francis Scott Key

Prices

ALL EVERBLOOMING ROSES LISTED

40c Each—3 for \$1.10—6 for \$2.00—12 for \$3.50

K. A. VICTORIA—This splendid rose should be in every garden. In color it is a soft pearly white, tinted with just enough lemon in the center to relieve the white; remarkably fragrant and has beautifully formed flowers on long, graceful stems. It is a strong, free, and healthy grower.

LADY HILLINGDON—Another exquisite rose with long pointed buds. The blossoms open up very double, and are of a beautiful deep apricot-yellow. It is an excellent bloomer and in every way a very fine rose.

LADY MARGARET STEWART—Golden yellow, splashed with bright red, inside and out. High-centered, full flower. Charmingly dainty.

MARGARET McGREDY—Carmine-rose, approaching a rich oriental-red at end of petals. Large, long-lasting flower with spicy scent.

MRS. CHAS. BELL—Soft shell-pink with salmon background and silvery surface. Full, globular shape. Continuous bloomer. Hardy. It is a thrifty grower.

MRS. HENRY BOWLES—A favorite pink at the World's Fair. It is large, full, deep pink and the blooms are on long stems. Always in bloom.

ROSES BY COLOR—1 Red, 1 Pink, 1 White, and 1 Yellow, our selection of varieties, special, 4 for \$1.50.

MRS. HENRY MORSE—Bright shrimp to salmon-pink blooms, with silvery shadings. Lovely pointed buds. Long lasting and is a free bloomer.

MRS. PIERRE S. DUPONT—One of the most popular yellow roses at the World's Fair. It is a glorious bright golden yellow of large size and many petals.

PRESIDENT HERBERT HOOVER—This is one of the most hardy roses we have. It is a strong grower and always in bloom. It is a vivid cerise-rose, softly suffused with yellow, orange, and scarlet. Be sure to plant this rose in your collection.

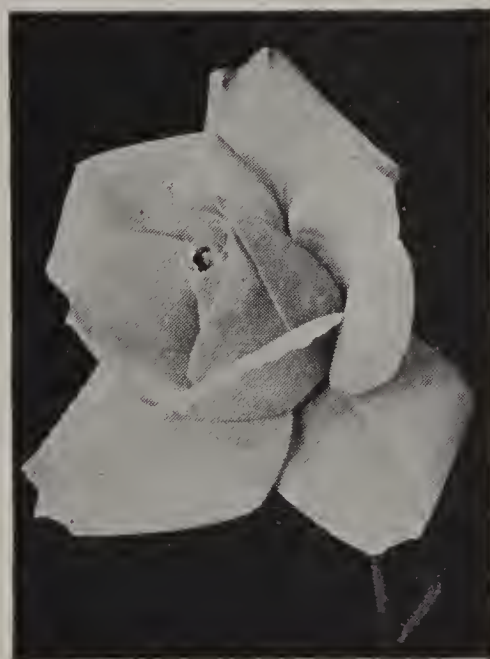

RADIANCE RED—Similar in every respect to the Pink Radiance, of which it is a sport, differing only in color, which is a red red that does not fade with age.

RADIANCE PINK—Brilliant, rosy-carmine. The buds are perfect and while the open flowers are not so large nor so full as those of some other varieties that produce only a few extra large blooms, nevertheless Radiance is today one of the most satisfactory ever-blooming pink roses, because it is one of the hardiest and always abundantly in bloom.

SUNBURST—A most magnificent rose. The color is superb, orange golden.

TALISMAN—A gorgeous combination of gold, rose, apricot, and blood red. Long shapely buds open to uniquely pointed petals. It is a very free bloomer.

WILLOWMERE—This rose is a bright shrimp-pink toning to a cream-pink at base of petals. Very hardy and is a good bloomer.

40¢ Each—3 for \$1.10
6 for \$2.00—12 for \$3.50

BABY DWARF ROSES

Prices 40c each or 3 for \$1.00

LAFAYETTE—Large blooms, cherry red, best bedding rose.

CATHERINE ZEIMET—Double, pure white, fragrant. Large clusters.

ERNA TESCHENDORF—Bright crimson, free bloomer, large clusters.

GEO. ELGERS—Golden yellow buds, opening lighter in color.

CLIMBING ROSE BUSHES

Two year plants, 40c each, 3 for \$1.00

AMERICAN PILLAR—Single rose pink, white center. Vigorous.

CLIMBING AMERICAN BEAUTY—Beautiful large buds opening bright crimson.

DR. VAN FLEET—Pale pink on fine, long stems. Beautiful.

GARDENIA—Large creamy yellow flowers. Vigorous.

PAUL'S SCARLET—Semi-double, shining vivid red. Climber.

SILVER MOON—Silvery white with yellow stamen. Semi-double.

HARDY CLIMBING VINES

TRUE BITTERSWEET—Bittersweet is a native climber with handsome, glossy green leaves and very attractive orange colored fruit that comes and stays on all Winter. I have one on my garage which in two years has covered the entire south side of the building. 50c each.

CLEMATIS—This is one of the most attractive and effective of the hardy flowering climbing vines. Especially adaptable for covering trellises, fences, walls and pillars.

Henryii—Flowers large and creamy white, from six to eight sepals. 75c each.

Jackmani—Covered from July to October with a dense foliage of purple flowers. A strong grower and a popular variety but very hard to get started. 75c each.

Paniculata—Flowers are medium in size, pure white, borne in immense sheets, and of a most delicious and penetrating fragrance. 50c each.

HONEYSUCKLES—All are rampant growers, forming great masses of vines that require sunlight and fail to form leaves in the shade. All are fragrant. 50c each.

Hall's Japan Honeysuckle—A strong, vigorous, almost evergreen sort, with pure white flowers, changing to yellow. Covered with fragrant flowers from July to December. Holds its leaves till January. The best bloomer of all.

Monthly Fragrant Honeysuckle—Blooms all summer; red and yellow; fragrant.

Scarlet Trumpet Honeysuckle—Strong, rapid grower, producing scarlet inodorous flowers.

IVY VINES—**Boston Ivy**—Leaves small and dainty, ivy-like in form. By overlapping each other they form a dense sheet of green. The plant requires some protection the first winter until

it becomes established. Will climb any kind of a wall. 75c each.

Engelmann's Ivy—A rapid-growing vine of the Virginia Creeper family but having characteristics of its own. Leaves are smaller and many more of them than those of the Creeper. Foliage of deep green. Will cling only to a rough surface such as brick or stone. 50c each.

WISTERIA (Purple)—The Wisteria is one of the most decorative of vines, and for porch decoration without too much shade it has no superior. It is a beautiful climber of very rapid growth, producing long, pendulous clusters of pale blue flowers in June and sometimes again in the fall; is perfectly hardy and one of the most superb climbing vines ever introduced. 50c each.

Hall's Japan Honeysuckle

HARDY HERBACEOUS PERENNIALS

See color illustrations on page 17

ARTEMISIA (Silver King) — Silvery stems and foliage. Good for summer and winter bouquets. 30c each; 3 for 75c.

BABY BREATH—Dense, spreading plant. Tiny feathery panicles. Delicate foliage. Fine for bouquets, and drying. 25c each.

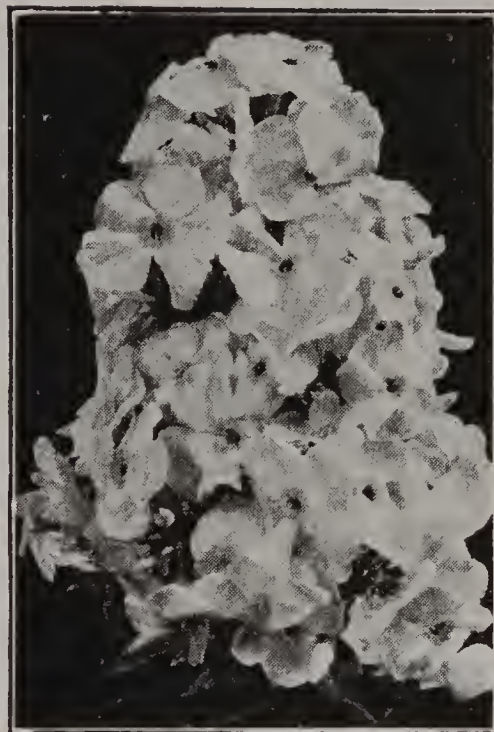

CHRYSANTHEMUM — The hardy "Mums" bloom profusely in October after everything else in the garden has been killed by frost. Yellow, pink and white, 25c each.

COREOPSIS LANCEOLATA — Flowers are rich golden-yellow, borne in great profusion nearly the entire summer. 20c each.

GAILLARDIA — Daisy-shaped flowers with orange tipped petals shading to scarlet in the center. Bloom all summer. Need sun. 20c each.

GOLDEN GLOW—Golden-yellow dahlia-like flowers borne on tall swaying stems. Blooms summer and fall. 20c each; 3 for 50c.

PERENNIAL SWEET PEA—One of the best and desirable flowering, hardy, climbing vines, growing to the height of 8-10 feet. Blooms all summer. Fine for cutting. Colors: red, white, pink and purple. 25c each.

Phlox

PHLOX—Most popular perennial. Thrives anywhere. Colors, shades of red, pink, white and purple. 25c ea.; \$2.00 per doz.

Phlox Collection Special

2 Red, 2 White, and 2 Pink for \$1.00
4 Each of Red, Pink and White for \$1.75

SHASTA DAISIES—Very well known. Double white flowers. Very good plant. 20c each.

BULBS

CANNAS — We have them in several colors. Large flowers. We have pink, red and yellow shades. 75c per dozen.

ROYAL IMPERIAL—A crimson red. Sends up several stems, each bearing many flowers. It is freest bloomer of lilies. Needs sunlight. 50c each; 3 for \$1.40.

TIGER LILY—A well-known old lily that is dependable. Light salmon with red spots; blooming in July. 25c each.

GLADIOLAS—Mixed colors. 50c per dozen; \$3.50 per hundred.

DAHLIAS—Too well known for description. Red, pink, white, yellow. 20c each; 6 for \$1.50.

PEONIES—Selected to color. Dark red, light red, dark pink, light pink, white. 40c each; 6 for \$1.95. Large size, 50c; medium, 35c; small, 25c.

LILIES, Regale—Hardy in all locations. Very fragrant odor. Grows 4-5 feet tall. Large trumpet-shaped flowers. White on the outside and yellow inside. Large size, 50c; medium, 35c; small, 25c.

Ornamental Grasses

HARDY PAMPA GRASS—Height, 10 feet. Long plumes. Small division, 15c; clumps, 35c.

EULALIA GRASSES—Graceful foliage. Height, 5 feet. Plumes appear in fall and will keep all winter. Division, 15c; clumps, 35c.

Plant Bleeding Heart Among Your Evergreens, Roses and Hardy Shrubs

It is an old-fashioned favorite. Its arching stems bear drooping heart-shaped flowers of white and rose-red. It is perfectly at home in any part of the hardy border and especially valuable for planting in shade. Set among Evergreens it gives a splendid contrast and is very effective. Very rare. Each 35c.

Journal compilation © 2007 Blackwell Publishing Ltd

for Only \$2.45

Forsythia Spectabilis Commonly called Golden Bell because of the bell-like, yellow flowers that cover the plant in early spring.

Spirea van Houttei The old fashioned Bridal Wreath is probably the most popular of all shrubs. Early in spring the bushes are literally covered with clusters of white flowers. Grows rapidly and withstands drought. Each 35c.

Red Leafed Barberberry A round, dwarf shrub with bronzy red leaves. Its red berries stay on the plant well into the winter. An interesting novelty. For best results water liberally in dry weather. Each 50c.

A painting of a flowering branch, likely Forsythia, with numerous bright yellow blossoms. A circular inset in the upper right corner provides a magnified view of a few individual flowers, showing their five-petaled structure and central stamens. The background is a mix of soft, painterly textures in shades of blue, green, and white.

10

A close-up photograph of a flowering plant, possibly a geranium, showing a dense cluster of small, five-petaled flowers in shades of pink and red. The flowers are interspersed with dark green, serrated leaves. The background is a soft, out-of-focus light green.

A circular inset showing a close-up of a pink, spiky flower, possibly a cactus or succulent, set against a dark background.

FLOWERING SHRUBS

That Bloom from April to October

BUY NOW AT ROCK-BOTTOM PRICES!

See color illustrations and collection offer on preceding page.

People are appreciating more the permanent value and beauty of shrubs. The charm and grace they lend to home grounds is invaluable, and if judicious selection is made, it is possible to have a continuous succession of bloom from early in April to the days when the frost again nips the flowers of the very latest blooms.

ALMOND—Pink flowering, grows to 3 to 4 feet high. Blooms in April. Very attractive shrub. The plants are usually thickly studded with double pink flowers of medium size from base to tip of branch. 12 to 18 inch size, 30c each; four for \$1.00.

ALTHEA or ROSE OF SHARON—We have these in White, Pink, Red, and Purple. The Pink and Purple varieties are the best. The Altheas are fine, free-growing flowering shrubs of very easy cultivation. Desirable on account of flowering in August and September, when nearly every other shrub or tree is out of bloom. They require some pruning each spring. 2 to 3 foot size, extra heavy, 50c each; 4 for \$1.50; 3 to 4 foot size, 60c each; 4 for \$2.00.

BARBERRY—NEW RED-LEAVED—A brilliantly colored shrub with its bronzy-red leaves all season, becoming brilliant orange-scarlet in the fall. It adds a touch of color among greens of the other plants. Plant in full sunlight. Grows 3 feet tall. Heavy 12 to 18 inch size, 50c each; 3 for \$1.25. 18 to 24 inch size, 75c each, 3 for \$2.00.

BARBERRY — JAPANESE — Probably the most widely planted low growing shrub. Ideal for border and foundation plantings. Makes a low, dense rounded bush 3 feet tall. Grows in the sun or partial shade. The foliage colors a beautiful red in the fall, with red berries which hang all winter. 18 to 24 inch size, 40c each; 3 for \$1.00; 24 to 30 inch size, 55c each; 3 for \$1.25.

BUTTERFLY BUSH (Summer Lilac)—It makes large shrubs for park planting. Single plants will often have 50 or more flower spikes the first year. The second year after planting it generally begins to bloom in June and continues throughout the summer until frost nips it. The flowers are produced on long, graceful stems that terminate in tapering panicles of beautiful lilac-colored flowers of miniature size and borne by the hundreds on flower heads frequently 10 inches long. This admirable shrub should be classed as semi-herbaceous, as it sometimes freezes back to the ground in severe winters, but comes up again from the roots. Heavy No. 1 plants, 35c each; 3 for \$1.00.

CRAPE MYRTLE—Familiar to everyone living in Oklahoma, Texas, and other southern states. It has small, very dark green shining leaf, and blossoms in August and September in panicles of peculiar but attractive flowers. The Pink and Watermelon Red are the hardiest and most showy varieties. 18 to 24 inch size, 35c each; 2 to 3 foot size at 50c each; 3 to 4 foot, heavy, 75c each.

DESMODIUM—Valuable for great profusion of pea-shaped, rose-purple flowers in September to late October. Grows to three feet, drooping very gracefully, being loaded down with blooms. The tops lie back in the winter. Useful in shrub masses or borders. Heavy plants 50c each.

DEUTZIA, Pride of Rochester—A fine double variety rather early. Flowers pink in bud, white when full expanded. 2 to 3 foot size, 50c each.

ELDER, Golden—The white, flat-topped panicles of bloom appear in the early summer; but the golden-yellow color of the leaves is the chief attraction, making the plant conspicuous among the darker green. 2 to 3 foot size, 50c each.

FORSYTHIA, Golden Bell—The Forsythias are the first shrub to bloom in the early spring, the small yellow flowers covering the branches before the tardy leaves appear. 18 to 24 inch size, 35c each; 2 to 3 foot size, 50c each.

HONEYSUCKLE—Pink Tartarian—Tall bushy shrub with pink flowers in the spring followed by red or orange-colored berries. Attains a height of from 8 to 10 feet. Its dense foliage and rank growth make it one of the best for screen planting. 18 to 24 inch size, 35c each; 3 for \$1.00. 2 to 3 foot size, 50c each; 3 for \$1.35.

HONEYSUCKLE—Red Tartarian—The flowers are borne freely in May and June and are of a bright red color, followed by showy red berries, which ripen in midsummer and cling to the bushes for several weeks. 18 to 24 inch size, 35c each; 3 for \$1.00. 2 to 3 foot size, 50c each; 3 for \$1.35.

HYDRANGEA — Arborescens (Hills of Snow)—Medium sized shrub growing 3 to 5 feet. The flowers are in a large way similar to the old and familiar Snowball in appearance, white and imposing, blooming throughout the season. Hydrangeas are excellent for solid low borders or foundation plantings; does well in the shade. Two year, 50c each.

HYDRANGEA—Paniculata Grandiflora (Hardy Hydrangea) — Blooms from August until late fall. The blooms are first white, then turn pink on the exposed side and finally a greenish-white in the late fall and hang on until late in the fall. Produces the largest flower heads of any shrubs. Two year size, 50c each.

KERRIA JAPONICA — Its numerous branches are graceful, slender, shiny, arching; the stems and foliage alike a brilliant green. Its abundant double flowers like half open rose buds, rich yellow, blooms continually throughout the summer. Suitable and very desirable for sheltered foundation planting. Three year shrubs, 50c each.

JAPAN QUINCE—This is the old fashioned Fire Bush. In the early spring just as the leaves are opening it is a gorgeous sight with its masses of brilliant scarlet blossoms. Foliage is dark green and glossy as though varnished. Heavy three-year plants, 60c each.

LILACS—Persian Purple — Filling the air with its delightful fragrance in June, large panicles of colorful bloom of unusual distinctiveness, you will want to plant this attractive shrub, either as an individual specimen, in groups or in the shrubbery border. Our Persian Purple Lilac, unlike the old common white or common purple, blooms the first year following transplanting. 2 to 3 foot size, 50c each; 3 to 4 foot size, 75c each.

PRUNUS CISTENIA (Red Leaved Plum) — Purple leaves, semi-dwarf, very showy. 12 to 18 inch size, 25c each, 3 for 55c; 18 to 24 inch, 35c each; 3 for \$1.00; 2 to 3 foot size, 50c each, 3 for \$1.25.

PRUNUS NEWPORT (Red Leaved Plum)—Bright red foliage and the shrub is a vigorous grower. 2 to 3 foot size, 35c each, 3 for \$1.00; 3 to 4 foot size, 50c each, 3 for \$1.25; 4 to 5 foot size, 75c each; 3 for \$2.00.

Ornamental Grasses

HARDY PAMPA GRASS — Height, 10 feet. Long plumes. Small division, 15c; clumps, 35c.

EULALIA GRASSES—Graceful foliage. Height, 5 feet. Plumes appear in fall and will keep all winter. Division, 15c; clumps, 35c.

PRUNUS PISSARDI (Purple Leaf Plum) — Brightly colored purple-leaved foliage, a distinct and handsome little tree shrub covered with a mass of small white single flowers in the spring; later with showy pinkish-purple leaves that deepen in color. Something different in its color contrast with the green foliage of other shrubs. 3 to 4 foot size, 35c each, 3 for \$1.00; 4 to 5 foot size, 55c each, 3 for

\$1.50; 5 to 6 foot heavy, 75c each, 3 for \$2.00.

PEACH — Double Red Flowering — Grows similar to a small dwarf peach tree and is a mass of red blooms in the early spring. This is a very showy tree shrub and everybody who has seen it has been highly impressed with its beauty. Be sure to plant one of these, even though it is the only shrub you plant. 2 to 3 foot size, 35c each, 3 for 90c; 3 to 4 foot size, 45c each, 3 for \$1.25; 4 to 5 foot size, 60c each, 3 for \$1.50.

WEIGELA, Rosea—Flowers are produced so thick they almost hide the limbs. Grows 5 feet tall. Flowers pink. 50c each.

SNOWBALL—An old time favorite with snowy white ball shaped flowers. Nice two-year plants 50c each.

TAMARIX (Hispid)—The best of all Tamarix varieties. Foliage soft blue-green; flowers delicate pink. Fine for cutting with roses. 50c each.

SPIRAEA VAN HOUTTEI—Very graceful, spreading shrub. Most popular of all the spireas. Masses of lacy white flowers early spring. Small size, 10c each; medium, 20c each; large 35c ea.

SPIRAEA ANTHONY WATERER — Dwarf shrub. Fine for borders and edging. Flowers red all summer blooming period. 40c each; 3 for \$1.00.

SPIRAEA FROEBELI — Same as Anthony Waterer only taller and flowers not so bright. 40c each.

SPIRAEA THUNBERGI — Small early bloom. Foliage very pretty and soft. Large, 45c each.

Prunus Pissardi

EVERGREENS

A judicious planting about the home indicates refinement as well as increased selling value.

All evergreens are priced balled and burlapped, unless otherwise noted.

Pfitzer Juniper

BIOTA AUREA NANA — Berckman's Golden Arbor Vitae—This is without doubt the showiest of the Arbor Vitae family. The color is an unusual bright green, turning to a golden-yellow in the winter months and is striking in appearance. Our Berckman's Golden is dwarf, very seldom growing over four feet in height, and is compact and dense, never needing any pruning as they make and hold their own shape. Does especially well and should be in every planting. Requires sunshine.

18 to 24 inch size.....\$2.00 each
24 to 30 inch size..... 2.50 "
30 to 36 inch size..... 3.00 "

JUNIPER CHINENSIS PFITZERIANA, Pfitzer Juniper—The best low spreading evergreen for this locality. This tree grows in the form of a low inverted pyramid. The foliage is of a feathery type, uniform even green and thrives just as well in a hot dry situa-

tion as in the cooler temperatures of the north. The hardiest evergreen we have. Will grow in the shade.

12 to 15 inch size spread.....\$1.00 each
15 to 18 inch size spread..... 1.50 "
18 to 24 inch size spread..... 2.00 "
24 to 30 inch size spread..... 3.00 "

BIOTA ORIENTALIS COMPACTA — Compact Chinese Arbor Vitae—Dense, compact upright grower. Very excellent for yard plantings. Absolutely hardy, requiring very little attention.

2 to 3 foot size.....\$2.00 each
3 to 4 foot size..... 3.00 "
4 to 5 foot size..... 4.00 "

JUNIPER SAVIN—Prostrate spreading branches with sombre green foliage. Hardy and well adapted for hillsides, etc.

24 to 30 inch size spread....\$2.50 each

JUNIPER VIRGINIANA GLAUCA —
 Blue Cedar—It is a rapid grower, specimen tree, becoming 15 feet high. Can be kept trimmed. Has a striking silvery blue color. 4 to 5 foot size, \$4.00 each.

JUNIPER VIRGINIANA—Red Cedar—
 This well-known native variety grows to a tall stately green tree, with dark green foliage. It is excellent for naturalizing, but may be kept sheared to any desired height or shape. Note elsewhere for prices on small sizes for windbreak purposes. The sizes listed below are for specimen trees.

- 2 to 3 foot size.....\$2.00 each

PLANTS FOR ORNAMENTAL FENCES

There is no better line of improvement that can be put upon a property than a well-kept hedge. A living fence—one made from growing plants, attractive with their green leaves, formal trained or arched branches, colored foliage or bright berries—is surely more pleasing than the still, rigid, mechanical effect obtained by the similar use of wood or metal.

To be a success, a hedge must be intelligently set and properly cared for. Start with vigorous plants of an even grade. Dig a trench, and set the plants evenly and tread the soil firmly around them. After they are planted, cut down to one level. Cut two-thirds of the top back. Set 10 to 12 inches apart.

AMoor River Privet—For neatly-trimmed formal hedges about the lawn, no shrubs are more popular than the privets. The varieties we grow are ideal fence plants. They withstand frequent shearing and the more often they are trimmed, the better they look. Every lawn should have its boundaries marked by a row of our Privets, neatly trimmed. Our Amoor River Privet is very hardy, with glossy green foliage and holds its color almost the entire year. It will stand shearing to any extent.

	Per 100
Good plants, 12 to 18-inch.....	\$ 6.00
Heavy plants, 18 to 24 inches.....	10.00

CALIFORNIA PRIVET — This most popular hedge plant is of a free, up-right growth, with glossy dark green leaves. Nearly evergreen in the Southern states. After setting, prune to within 4 to 6 inches of the ground, also prune severely the next one or two seasons after planting to maintain the height and shape desired. California Privet has a tendency to winter-kill north of Oklahoma.

	Per 100
Nice plants, 12 to 18-inch.....	\$ 5.00
Extra good plants, 18 to 24 inches.....	7.00

SHADE AND ORNAMENTAL TREES

At Prices You Can Afford to Pay

PLANT TREES TODAY FOR TOMORROW'S SHADE—The recurring droughts have proven it is necessary that more trees be planted. The Government is doing its part, but it is up to us to help. Plant more trees, but be sure that they are nursery grown and have been inspected against scale and other tree diseases. Do not buy your trees of some man who offers to go out and dig you a "creek dug" tree for 50c or so. It will prove costly at any price.

CATALPA BUNGEII—Umbrella Catalpa—Just the tree to be used for formal effect. Propagated on a stem of the Catalpa Speciosa. It makes a very unique ornamental tree. Has a broad dome-shaped head at the top of a long straight stem. When the tree attains its full growth the top is often 15 feet in diameter, on top of a strong stem from 7 to 8 feet in height. Very hardy. Extra nice specimens at \$2.00 each.

ELMS—American White—One of our best native trees, making a beautiful lawn or street tree, growing to be about 50 to 75 feet high with drooping, spreading branches. We have a nice block of extra straight, smooth, and well rooted American Elms and note these low prices—much lower than you will find elsewhere.

	Each	Dozen
5 to 6 foot height.....	\$0.60	\$ 6.00
6 to 8 foot height.....	.75	8.00
8 to 10 foot height.....	1.25	12.00
1¼ to 1½ inch caliper....	1.60	18.00

ELMS—Vase Shape—An American Elm with vase formation of limbs. Uniform type, because all are "budded" from an original tree. This tree is a very rapid growing Elm and is also a distinct and improved variety over our American Elm. This variety is resistant to borers and other insects of the common Elms. Costs a little more, but they are worth it.

	Each	Dozen
6 to 8 foot height.....	\$1.00	\$10.00
8 to 10 foot height.....	1.50	15.00
1¼ to 1½ inch caliper....	2.00	18.00

ELMS — CHINESE — Hardy Siberian strain of Chinese Elm trees, which thrive everywhere, even in the coldest climates and on the poorest of soil. This tree grows very rapidly, forming a semi-conical, dense head. May be shaped as desired. The leaves are dark green, fine and artistically cut. The Chinese Elms are not subject to diseases of other Elms. This has proven to be a popular street, park and shade

tree in southern Kansas and northern Oklahoma. We offer only well rooted and well branched trees. Our prices are about one half asked by many nurseries for trees of this character and quality.

	Each	Dozen
3 to 4 foot height, two years	\$0.30	\$ 2.50
4 to 5 foot height, two years40	4.00

8 to 10 foot height, three years	1.50	15.00
1½ to 2 inch caliper, four years	2.50	24.00

LINDEN—A round-headed tree with large heart-shaped, bright green foliage. A fairly rapid growing tree and one of our prettiest of the hard wooded varieties for use in southern Kansas and northern Oklahoma. We have some excellent trees in this variety running 5 to 6 foot at \$1.50 each.

MAPLE—Soft or Silver—A very rapid growing tree of graceful, spreading habit, with leaves of light green above and silver underneath. Desirable for either lawn or street planting. Will grow in poor and dry soil. We have a nice block of these in straight well-

Chinese Elm

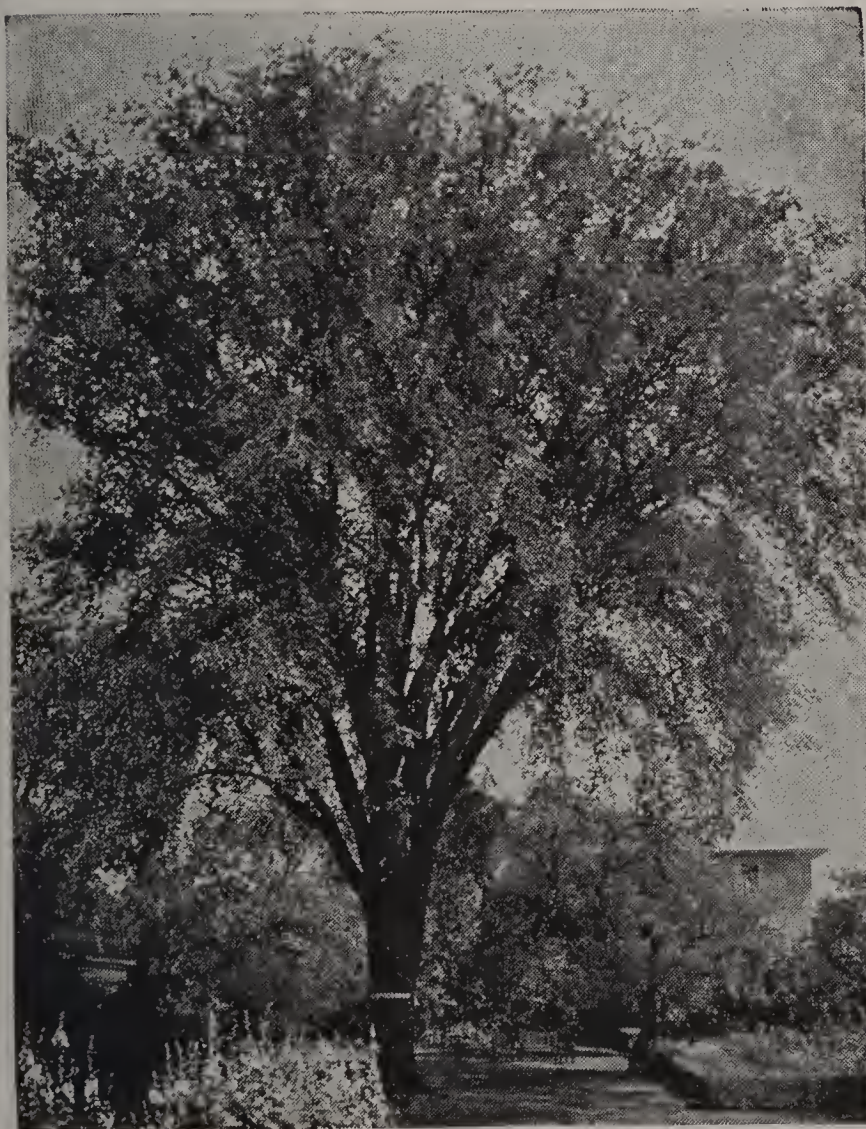

rooted smooth barked trees; every one a dandy.

	Each	Dozen
6 to 8 foot height.....	\$0.85	\$ 9.00
8 to 10 foot height.....	2.00	18.00

MAPLE—Sugar or Hard—A splendid hardy ornamental tree with foliage turning bright orange to scarlet in the late autumn. We have nice well rooted trees, 6 to 8 feet high at \$2.25 each; 8 to 10 foot size at \$3.00 each.

OAKS — PIN — This is generally conceded to be the most beautiful and majestic of all shade trees. Grows in a symmetrical and pyramidal form and at maturity it reaches 60 feet or more in height. The bright green foliage is deeply cut and colors to a deep red in the fall. A sturdy rugged grower it adapts itself to all localities and is not bothered by insects or diseases. The Oak is a slow growing tree but it is also one of the most enduring. A tree planted now will not only be a pleasure to you, but to your grand children as well. 6 to 8 feet high at \$2.25 each; 8 to 10 foot size at \$3.00 each.

PEACH — Double Red Flowering — Double flowers in early spring and is very showy. 4 to 5 foot size at 60c each; 3 for \$1.50. 5 to 6 foot 75c each; 3 for \$2.00.

American Elm

PRUNUS PISSARDI — Purple Leaf Plum—For description and prices see shrubs.

RED BUDS—Heart-shaped leaves, lavender flowers. The official state tree for Oklahoma. 3 to 4 feet, 75c each; 4 to 5 feet, \$1.00 each.

WILLOWS—A tall spreading tree with long drooping branches and narrow, dark green leaves. It is a very imposing tree of graceful beauty. This tree prefers a moist location and is at its very best when planted near a pond or stream. If you have a fish pool or a small pond in your garden, don't overlook planting one of these beautiful trees somewhere in the background of your flower garden. We have several varieties to offer and suggest the following as the best.

Wisconsin Weeping Willow—The most hardy of the many varieties of Weeping Willows. This tree is a rapidly growing sort with long pendulous branches. We have these in 5- to 6-foot size at \$1.50 each; and 6- to 8-foot size at \$2.00 each.

Niobe Weeping Willow — This is an exceptionally strong, hardy growing, graceful tree and of splendid drooping habits and it is very attractive and is of golden bark. This variety is a trifle higher than most Weeping Willows but on account of its beauty and hardiness it is worth much more. We have these in nice 6- to 8-foot size trees at \$2.00 each and 8- to 10-foot size at \$3.00 each.

PUSSY WILLOW—A very popular willow on account of catkins in March or April before the leaves form. This can be used as a shrub in your screen or border or may be planted as an individual specimen. 2- to 3-foot size, 40c each; 3- to 4-foot size, 60c each.

POPLARS—Lombardy. This is a very tall growing variety, pyramidal in form. This tree is especially valuable for landscape planting and is used freely for screens and hedges. The trees we grow are branched very low to the ground, making them doubly valuable for this purpose.

	Each	Dozen
5 to 6 feet.....	\$0.40	\$ 4.25
6 to 8 feet.....	.60	6.00
8 to 10 feet.....	.75	7.50

Ask us for any kind or sizes of any trees not listed in our catalog. We have several other kinds; and many larger and smaller sizes in the varieties listed.

FOREST TREES

For Shade, Post Timber Groves, and Windbreaks

PLANT FOREST TREES FOR PROTECTION AGAINST
DUST STORMS, COLD WINTRY WEATHER.

View of Farm Home Properly Planted with Forest Trees

The dust storms of the past few years have shown us the urgent need for windbreaks during the summer months. Also, the windbreaks break the force of the cold wintry winds. If your farm buildings are protected by a windbreak of forest trees your cows will give more milk, your steers will make more weight, and your hens will lay more eggs. And, it will take a lot less fuel to heat your home—and how much more comfortable it is to work around your barn lot. During the hot summer months think of the shade and comfort an acre or so of forest trees will give to your stock.

Our forest trees also provide the means for a lot of cheap post timber—something you need and which can be sold at a profit to your neighbors.

The forest trees we are offering for shade, post timber, windbreaks, and shelterbelt plantings are one year nursery grown trees, straight, smooth, well rooted stock and at the attractive prices

we are offering no farmer can afford to do without these. Plant a thousand or more for a hedge or in a grove to serve as a windbreak for protection for your stock, or to grow into post timber. The expense is very small, and while it pays you well to have shade and windbreaks for your stock, the added valuation, which these trees will add to your farm, will mean much to you.

CATALPA SPECIOSA—This is the hardy western type and grows rapidly, resists drought remarkably well and has hardly any insect enemies. As a post timber it ranks with the Black Locust and Osage Orange. Very fine for groves.

	Per 100	Per 500	Per 1,000
6 to 12 inch size.....	\$0.50	\$2.25	\$3.75
12 to 18 inch size.....	.85	4.00	7.00

2 to 3 foot size.....	4.00	15.00	28.00

ELM, CHINESE—These are especially fine for windbreak and wood lot planting. No tree will make a windbreak as quickly as the Chinese Elms. They leaf out very early in the spring and the leaves hang on very late in the fall. They have such a dense mass of twigs, branches and limbs that even with the leaves off they are a very effective windbreak. Set these four to six feet apart for groves or windbreaks. We have an extra nice lot of Chinese Elms—all well branched and well rooted—and we are making a rock bottom price so that you can't afford to be without them. Plant this spring. In less than three years you would refuse hundreds of dollars for them.

MULBERRY, Russian—The best for hedges, post wood, or timber. Plant around your barn lot for a windbreak or in a grove for protection for your stock. The Russian Mulberry can also be used as a hedge around your cherry orchard as the fruit ripens about the same time as cherries and the birds prefer the mulberry fruit. In Wichita the Russian Mulberry is used extensively as an ornamental hedge as it stands shearing and can be kept

trimmed to any given height. For ornamental hedges we recommend the extra heavy busy size running 3 to 4 feet.

	Per 100	Per 500	Per 1,000
6 to 12 inch size.....	\$0.70	\$ 3.00	\$ 5.00

Nut Trees

PAPER SHELL PECANS—The demand for these nuts increases from year to year. The Pecan has, by means of selection, been made to produce the fine thin-shelled, large fruiting varieties. We recommend for your use the Stuart and Success thin-shelled varieties. Nice well-rooted trees, 2 to 3 feet, at 90c each.

THOMAS BLACK WALNUTS — A grafted type. The tree grows twice as fast as the ordinary Walnut. Transplants easily and is very hardy. The nuts are large and of good flavor. The best in well-rooted trees, 2 to 3 feet, at \$1.00 each.

SMALL FRUITS

Small Fruits are very valuable to the home garden. Blackberry, Raspberry, Gooseberry, Strawberry plants, Rhubarb, Asparagus, Grape Vines, and others are easily cultivated and produce abundant crops every year on a small piece of ground. Plant a nice selection of all of these for home use. How much better are home ripened and freshly picked fruits than those shipped in from a long distance.

ROGERS' RHUBARB

RIVERSIDE GIANT — Every family garden should support ten or more clumps of Rhubarb in heavily manured soil. Unfailing crops for many years to provide pies, fresh sauce, a canning supply, and cordial. Long, thick, brittle stalks surcharged with juice of refreshing flavor. Pink to carmen color; highly attractive to dessert dishes. 15c each, \$1.50 per dozen.

ROGERS' GIANT WINE-RED RHUBARB

This variety is the kind that is proving so successful and profitable to commercial gardeners. We have been growing this wonderful variety over a long period of years and thoroughly recommend it to our customers. Rogers' Giant Wine-red will not "seed" as it is propagated from divisioned plants. Every stalk is alike. All big and crimson-red in color. Very sweet and tender. 15c each, \$1.50 per dozen.

ASPARAGUS

Asparagus is another delicacy that comes early from the vegetable garden. Like all very early vegetables, it costs quite a good deal; and yet a bed of asparagus in your garden will keep your table supplied and last for years. We handle two-year crown plants which will throw up sprouts for use the first year. Martha Washington,

Palmetto, or Con-	12	100	1000
over's Colossal	\$0.50	\$2.50 \$12.00

Martha Washington Asparagus

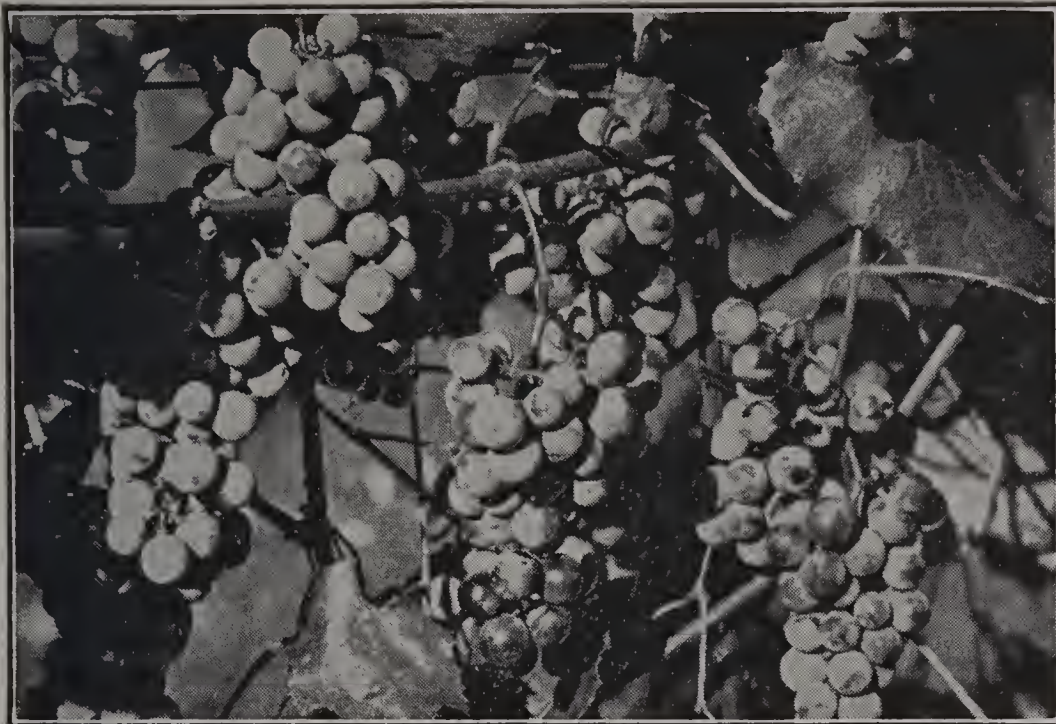

HORSERADISH

Selected Bavarian variety. Excellent for home use; easy to grow. The crowns are the whole root and will make hills the first year. The cuttings are piece roots. We can furnish either crowns or cuttings. Crowns, 5 for 50c, 10 for 90c, 25 for \$2.00. Cuttings, 25c per 10, 50c per 25, \$1.50 per 100.

SAGE PLANTS

The good, old fashioned kind that you use for seasoning sausage and in dressing for chicken, turkey and duck. Order a dozen plants as the home grown product is far superior in quality and seasoning to that which is grown and packed commercially. 3 for 40c, \$1.25 per 10.

GRAPES—More Money Crops!

Concord Grapes

Agawam

AGAWAM (Rogers' No. 15)—The most widely known of the Rogers' Hybrids. The bunches are large. The berry is large, rich and sweet. The vine is vigorous. The Agawam ripens after Concord and can be kept much longer and improves in flavor. Seems to prefer clay soil. Of the red grapes, it is the easiest grown and one of the most dependable. For home and market use.

CONCORD—The only grape that is supreme for every purpose. Bunches measure 5-6 inches long and are very compact. Berries large, bluish-black, covered with attractive bloom. Juice rich wine-purple, sweet and delicious fresh or canned. Highest keeping and shipping quality. Vines hardy, disease resistant, and succeed on poor soil.

CACO—A vigorous, prolific grower. The Caco is a hybrid produced by hand pollenization of the Catawba and Concord. It is a perfectly hardy grape, beautiful, large wine-red. Extremely rich, sugary flavor. It is making good in all soils and sections, so that we can recommend it on the basis of performance. Ripens in advance of Concord. The vine is very strong, vigorous grower, healthy and prolific. The fruit sells in the open market at double the price of other varieties.

MOORE'S EARLY—Bunch of medium size and compact. The berry is very large, black and of good quality. Bears regularly, but not as heavy as Worden. It is a good market grape on account of its earliness, ripening the last of July.

NIAGARA—We believe this to be the best white grape grown. The bunches are large and long. The quality is of the best. Very hardy, bears regularly and abundant crops, and proves profitable as a commercial variety here.

SALEM—A rich, dark red, early grape of excellent flavor, as are all Rogers' Hybrids, ripening slightly before Concord. An excellent garden variety.

WORDEN—The best black grape we have found. The bunch is large, compact and ripens evenly. The berry is large, thin skin, and very fine flavor, rich and very sweet. The vine is perfectly hardy, bears heavy and is very prolific. The fruit readily sells at double the Concord price.

BLACKBERRIES PAY

Early Alfred Blackberry

Alfred has been grown by leading fruit growers and proven the Best Early Blackberry variety. We unreservedly recommend it to our customers as thoroughly satisfactory and the equal of any blackberry, early or late, when it comes to producing big crops and paying worth-while profits. Think of a bush full of tremendous big blackberries from 1½ to 1¾ inches long, practically free from seeds, coreless and with a thick pulp fairly bursting with sweet delicious juice. That's Alfred!

Alfred berries are bigger, brighter colored, of better flavor and bring better prices right along. Once you grow Alfred you won't be satisfied with any other berry—fine, large berries that carry well to market. The plant is such a vigorous, healthy grower that it produces a good crop the first year after planting. Withstands cold that kills less hardy varieties. Alfred will please you—whether raised for pleasure or profit. It is another of our splendid varieties—selected for its worth.

BLOWER—Highly recommended. Large size, good flavor, jet-black; good shippers; hardy; prolific bearers. Does not winter-kill, and from all indications is a valuable kind.

EARLY HARVEST—This, along with Mersereau, is our favorite. The bush is perfectly hardy, cane stiff and upright. The fruit is of good size, long, and has very small seeds. The Early Harvest has never failed, despite our occasional dry seasons. In productivity the Early Harvest is a surprise to everyone, the bushes being weighted to the ground with fruit. Set one-half of your acreage to this early variety.

Early Alfred Blackberry

Prices on All Varieties Listed

Per	12	25	100	1000
Each				
\$0.12	\$1.10	\$2.00	\$4.78	\$42.00
All Heavy No. 1 Root-Cutting Plants				

MERSEREAU—Some nurserymen have a dewberry mixture in the plants which they are offering for Mersereau, which has hurt the reputation of this wonder blackberry. Our Mersereau are of the genuine strain, and we feel that for a late berry no variety is better. Our genuine Mersereau are, without a doubt, the blackberry of all blackberries. It is very large, jet-black, luscious and has all the qualities of an ideal berry.

DEWBERRIES

The Dewberry is a dwarf and trailing form of the blackberry. The fruit is highly prized as a market fruit owing to its large size and fine quality. Set the plants two feet apart in the row and cover in winter with coarse litter. Should be mulched in the spring to keep the fruit off the ground.

Selected No. 1 Strong, Healthy Plants

Kind	Each	12	100
Thornless Dewberry	\$0.12	\$1.00	\$5.00
Lucretia	.10	.70	3.00
Austin	.10	.70	3.00

LUCRETIA—The best known and widely planted Dewberry. The fruit is large

and of good quality, very sweet and of delicious flavor. The canes are very vigorous and productive. Ripens early.

AUSTIN—Similar to Lucretia, but not its equal in the North. Recommended for our southern Oklahoma and Texas trade. It originated in Texas.

THORNLESS—This Dewberry is absolutely thornless. The bush is very hardy and makes a vigorous growth. Although being a late introduction, the Thornless Dewberry is of proven merit. It is a good bearer. The fruit is very large, jet-black, juicy, sweet, and of very fine flavor.

BOYSENBERRIES

These are a three way cross of the Blackberry, Raspberry, and Loganberry. These big delicious berries can be grown almost anywhere in the country, as they stand the hot summers of the south and the cold winters of the north. The Boysenberry has rapidly established itself as the largest, finest, and most popular and widely planted berry. It adapts itself easily to a wide range of climatic and soil conditions. The plants should be mulched during the winter months. The enormous size of the berries, the large crops they bear, and the quality of the fruit for jams, jellies, pies, or for eating fresh have combined to make the Boysenberry the most talked about berry in this country. Be sure to include this plant in your order.

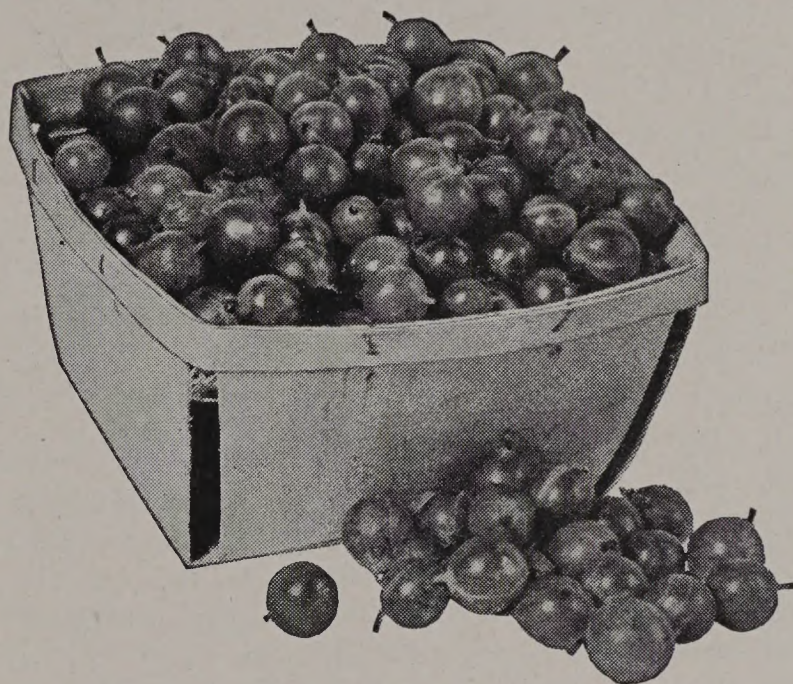

PRICES FOR HEAVY NO. 1 PLANTS

6 for 75c; 12 for \$1.25; 25 for \$2.00
100 for \$7.00

Delicious Youngberry

This new fruit, a cross of the Loganberry and the Dewberry, has become very popular, planted from coast to coast. It has such a wonderful flavor, delicious to eat fresh, and makes the finest sauce you ever tasted. The fruit is very large, a handsome dark wine-red color, sweet and delicious, highly flavored, almost seedless. A tremendous bearer. It is a very easy plant to grow. No other fruit has become so popular in such a short time. Plant some this spring; you are sure to like them.

Prices on Youngberry, Select Plants
—3 for 30c, 6 for 50c, 15 for \$1.00,
25 for \$1.55, 50 for \$2.85, 100 for \$4.95.

Pearl Gooseberries

GOOSEBERRIES

An exceedingly profitable fruit when properly handled. The market is never supplied here to any extent. Gooseberries can be gathered and marketed over a long season. Every home garden should have a dozen or so bushes, as you will find gooseberries are very easy to grow. The fruit is extremely desirable for many uses. Gooseberries require very little room and attention.

Price: Heavy two-year plants, all varieties, 25c each; \$2.50 per dozen.

HOUGHTON—The old standard variety; bush drooping, hardy and prolific.

DOWNING—Larger than the Houghton, roundish; light green, juicy, fine quality; bush more upright than Houghton.

CARRIE—This variety originated in Minnesota and has proven hardy and vigorous in nearly all sections. The plant makes an exceptionally strong growth and produces larger crops of berries than any other variety we offer. When fully ripe the berries are red. Quality good.

PEARL—The finest berry we have tasted; very large, round, juicy, extra quality. Two-year bushes were covered with berries one inch in diameter.

RASPBERRIES

There Is Nothing so Delicious as Raspberries

Winfield Raspberry

(The Wonder in Berry Production)

This grand new blackcap originated at Winfield, and after ten years of testing has proved itself the "King of Blackcaps."

In hardiness and productiveness it is unexcelled by any other variety. Has never winter-killed through ten seasons' fruiting, and stands extreme droughts.

The fruit is of enormous size, single berries often covering a quarter. Four to six great clusters are produced on each cane, averaging from three to six quarts to the plant. Fruit is firm, sweet, rich and juicy; seeds very small, fine flavor.

Bush is heavy and vigorous, making robust, stocky canes, easily supporting their heavy loads. Not troubled with rust or anthracnose. Succeeds on all soils.

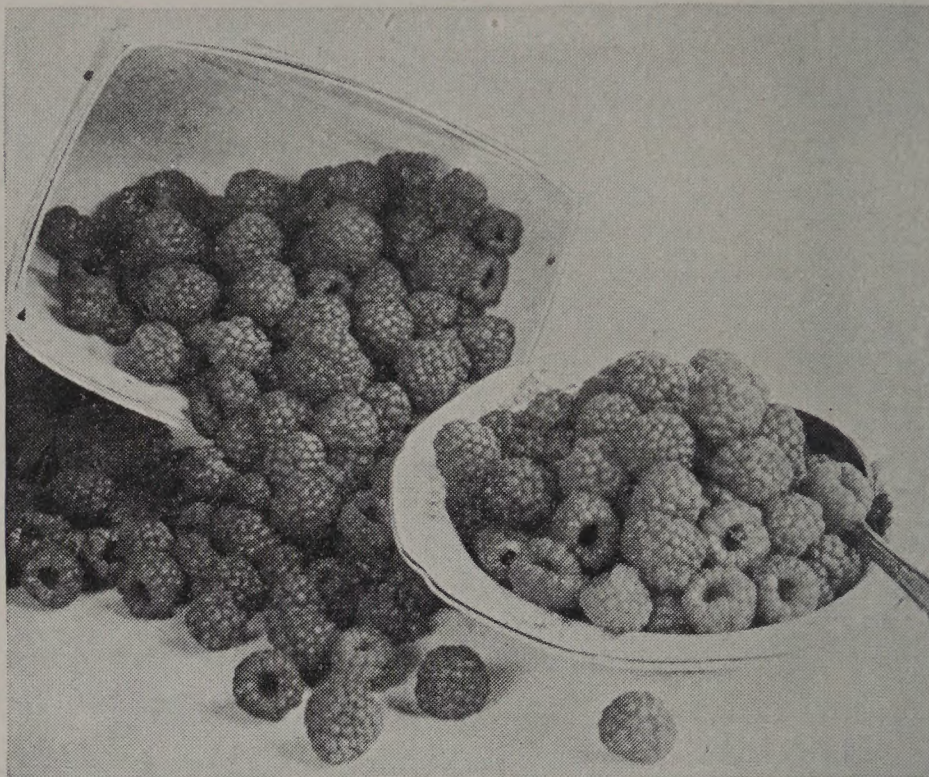

CUMBERLAND—The most widely known black raspberry. Planted because of its productiveness and quality. Berries are extra large, fine and sweet. It is usually hardy.

New Logan (Early)

80c Per 12 Plants

NEW LOGAN (New)—Earliest of all, brings early market prices. Ripens a week to 10 days ahead of others. Berries large, "meaty" and well flavored. Experiment stations find New Logan to be one of the most outstanding Black Raspberries. Fine for home use. Berries are large, not "seedy," one of the best for table or canning, jams and the like. New Logan plants are grown from young healthy stock plants, not from old fruiting plants that become weak plants. We have only the best, most vigorous and highly productive plants for you, freshly dug, not storage plants. One and two-year plants. Quickest returns will be from the two-year plants (transplants).

LATHAM—Yields twice as much as other red raspberries. A new red raspberry that was originated in Minnesota and acclaimed for its hardiness

Chief Red Raspberry

in that state. During the past few years its merits have spread with its planting throughout the Middle West. Produces very strong, vigorous canes, very productive. Berries are large, of highest quality, ripen evenly and hold up well throughout the season.

Chief Red Raspberry

The New Hardy Disease-Resistant Early Raspberry

CHIEF—The new Chief Raspberry has been grown in test grounds all over the country during the past ten years, and has proven to be one of the best varieties for Kansas and Oklahoma.

STRAWBERRY PLANTS

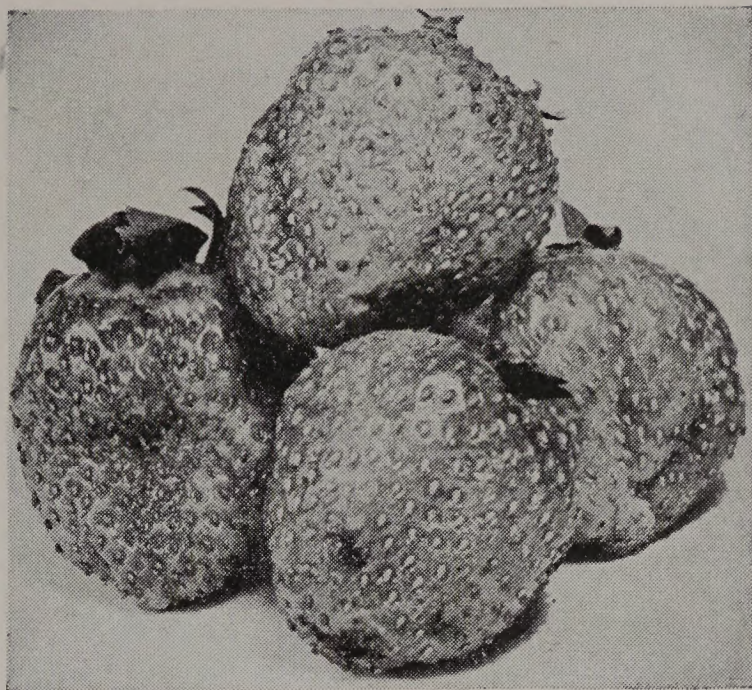

FRESH DUG, EXTRA WELL ROOTED

300 or more plants of any one variety at the given 1,000 rates.

AROMA—Another fine old variety that has retained its popularity down through the years. The fruit is large, bright red and of delicious flavor. A good shipper on account of its firm texture. The period of bearing is long and it is a heavy fruiter, but does not bear as heavy as the Senator Dunlap. The Aroma is the commercial strawberry of the Ozark region, because of its good shipping qualities. 65c per 100, \$5.00 per 1000.

BLAKEMORE—An early variety originated and developed by the United States Department of Agriculture, and has been thoroughly tested in all parts of the country. Dark red fruits of good quality and fine flavor. Because of its excellent keeping and shipping qualities, it is becoming a popular variety in the South to ship to the early Northern markets. 65c per 100, \$5.00 per 1000.

FAIRFAX—Medium-early, self-pollenizing, frost-resistant, standard type. Make well-filled fruiting rows. Thrive on heavy land, but succeed on any fertile soil. Immense berries, of uniform size and plump shape. Dark, carmine-red to the center, ripen to an even color. Uniformly firm in flesh and skin, giving them supreme shipping quality. Have won highest praise for their fancy eating quality. Look bet-

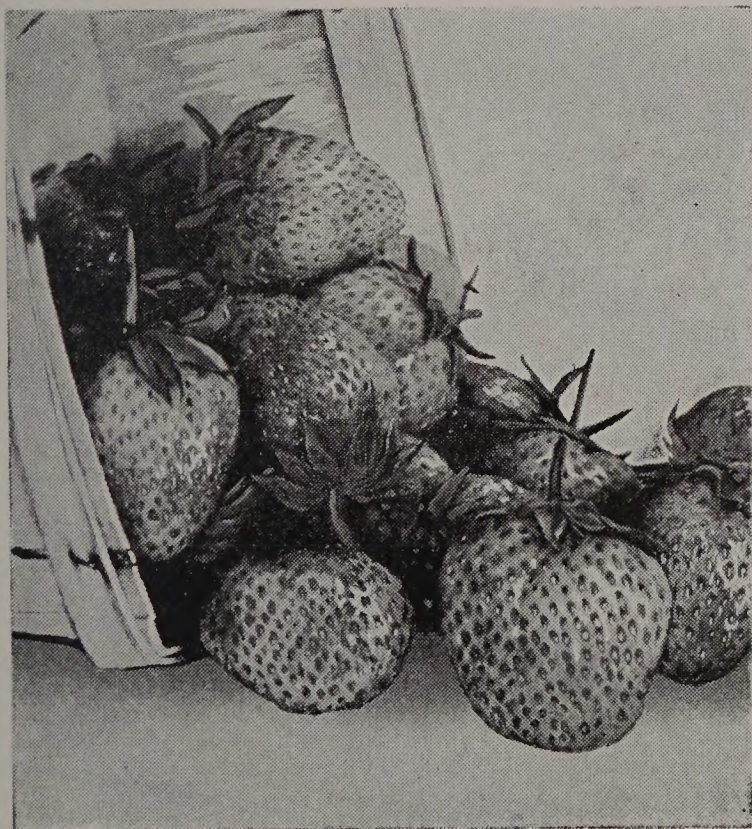

Mastodon Everbearing

ter—taste better—and are better than older varieties! Don't delay — get started with Fairfax this year! Prices: 25 plants 39c, 50 for 69c, 100 for \$1.00, 200 for \$1.75, 1000 for \$7.50.

Mastodon Everbearing Strawberry

Without a doubt this is the ever-bearing Strawberry. In the spring crop the berries are large, sweet, well flavored and will equal Senator Dunlap for bearing qualities. It bears excellently during the summer months and also does extra well during the fall bearing season. This variety is good and we heartily recommend that each of our customers buy a hundred or two hundred plants for their garden. \$2.00 per 100, \$5.00 per 300, \$10.00 per 1000.

Senator Dunlap

SENATOR DUNLAP—There is no known variety that is so universally popular nor one that is so extensively grown as the grand old Senator Dunlap. The fruit is very large, rich red, and of remarkably fine flavor. In addition to this, it is a heavy producer, a splendid keeper, and cannot be excelled for shipping. The fruit begins to ripen soon after the earliest sorts and continues until near the end of the season. The plant is unusually hardy, stands our summer drouths well, and will respond readily to care. 65c per 100, \$5.00 per 1000.
